**Re: CC Docket No. 94-102,  
95% ALI-Capable Handset Penetration Requirement,  
Rule Section 20.18(g)(1)(v).**

**Third Quarterly Report**

Dear Ms. Dortch:

By Order (CC Docket No. 94-102), FCC 06-32, released March 15, 2006 (the “Order”), the Commission granted the Filer, Uintah Basin Electronic Telecommunications d/b/a UBET Wireless, an extension of time, up to and including March 15, 2007, within which to comply with the Rule Section 20.18(g)(1)(v) requirement that it achieve a 95% penetration level among its subscribers of ALI-capable handsets. The Filer has elected to deploy a handset-based E-911 solution. This report is submitted pursuant to the requirements of Paragraph No. 20 of the Order, and is as follows:

**Item 1: The number and status of E-911 Phase II requests from Public Safety Answering Points (“PSAPs”), including those requests that the Filer may consider invalid:** The Filer has received an April 11, 2006 PSAP request for E-911 Phase II service from the PSAP for Duchesne, Uintah and Daggett Counties, Utah. To date, no other requests for E-911 Phase II service have been received.

**Item 2: The dates on which E-911 Phase II service has been implemented or will be available to the PSAPs served by the Filer’s system:** In consultation with the requesting PSAP, the necessary facilities have been installed and are in the testing phase with the requesting PSAP. The Filer anticipates that the Phase II service for the three-county area will be online by November 15, 2006. The requesting PSAP has agreed to this deployment schedule.

**Item 3: The status of the Filer’s coordination efforts with PSAPs for alternative 95% ALI-capable handset penetration dates:** The Filer has coordinated its E-911 plans with the various PSAPs in its service area. The Filer intends to notify the PSAPs of its March 17, 2007 deadline for achieving a 95% ALI-capable handset penetration level.

**Item 4: The Filer's efforts to encourage customers to upgrade to ALI-capable handsets:** For the months of November 2005, December 2005, January 2006, February 2006, March 2006, April 2006, May 2006, June 2006 and July 2006, the Filer offered three ALI-capable handsets at a reduced price. All new handset activations are ALI-capable.

The Filer has again offered three different ALI-capable handset models at a reduced price. In the coming months, the Filer plans to offer a free ALI-capable handset in exchange for the customers turning in their remaining analog handsets.

To achieve compliance with the revised, March 15, 2007 deadline, the Filer plans to continue to advertise ALI-capable replacement handsets and to continue requiring that all new handset activations be ALI-capable. For example, for the months of August and September of 2006, the Filer ran a series of advertisements promoting the Motorola M800 ALI-capable handset as a replacement unit for existing customers.

**Item 5: The percentage of the Filer's customers with ALI-capable phones:** 79%.

**Item 6: Until the Filer satisfies the 95% penetration requirement, detailed information on the Filer's status in achieving compliance, and whether the Filer is on schedule to meet the revised, March 15, 2007, deadline:** See Response to Item 4, above. At present, the Filer anticipates that it will meet the revised, March 15, 2007 deadline.

Very truly yours,

**Uintah Basin Electronic  
Telecommunications d/b/a  
UBET Wireless**

Dated: October 31, 2006
